## PowerFlow Announces Pall Power Generation Market Expansion

*Lee's Summit, Missouri— July 26, 2016* — Pall Corporation, the world leader in filtration technology, has appointed PowerFlow Fluid Systems as the exclusive distributor for the Power Generation Market for the North Central Region of the US. This includes the states of Illinois, Indiana, Iowa, Michigan, Minnesota, N. Dakota, S. Dakota and Wisconsin. PowerFlow is a long standing distributor for Pall Corporation throughout the western and central portions of the U.S.

PowerFlow is a leading fluid systems, filtration and separation technology supplier to the energy industry. Headquartered in Lee's Summit, Missouri (in the Kansas City metropolitan area), PowerFlow has sales offices, support and stocking locations throughout the U.S. We distribute and manufacture a comprehensive line of fluid systems including filtration equipment, hydraulic power units, lubrication systems, chemical injection systems, blower packages, fluid transfer systems and more. We are a full service company and offer complete technical support, field services and contract project services. Our staff of highly trained and experienced engineers, service technicians and customer support personnel are knowledgeable in all aspects of power generation fluid systems applications.

We look forward to the opportunity to be of greater service to our customers in this region by offering more comprehensive product solutions, application knowledge and support. Our goal is to always strive to provide our customers with the best possible service at the most economical price, allowing you to focus on your objectives with the utmost peace of mind.
